

## THAI ULTRALIGHT REGISTER

What follows is a tabulation of the data currently known on ultralight aircraft registered in Thailand. It is inevitably incomplete and with errors. Corrections and additions would be very welcome to [steve.darke@psw ltd.com](mailto:steve.darke@psw ltd.com)

For ultralights a series prefixed 'U-' was introduced in 1998. Aircraft registered in this series must have a maximum take-off weight less than 500kg, a maximum cruise speed not exceeding 90 knots, and a stall speed below 40 knots.

Paramotors, Paragliders, Paraplanes etc (currently over 850 registered) are listed separately below the main listing.
