THAI ULTRALIGHT REGISTER

What follows is a tabulation of the data currently known on ultralight aircraft registered in Thailand. It is inevitably incomplete and with errors. Corrections and additions would be very welcome to steveozel@outlook.com

Introduction

For ultralights a series prefixed 'U-' was introduced on 1st January 1999. Aircraft registered in this series must have a maximum take-off weight less than 500kg, a maximum cruise speed not exceeding 90 knots, and a stall speed below 40 knots.

Paramotors, Paragliders, Paraplanes etc are listed separately below the main listing. It is believed that registration of these was not required from Jun10 onwards and (with the exception of U-A17) the 18Mar19 CAAT register shows all the 961 listed Paramotors, Paragliders, Paraplanes etc as 'CofR invalid'

- Aircraft currently-registered (but not necessarily active, or even airworthy) are highlighted in green, thus U-A01.
- Current owner/operator is also highlighted in green, thus Friends Flying Club.
- Details of previous and subsequent histories shown in brackets & green italics thus *[nnnnn]*

Clicking on registrations shown thus U-A14 or U-A01 (ie. underlined) will open a PHOTO of the aircraft from my Flickr page. You will find lots more, 17,000+, photos directly on my Flickr page.
